2008 Reporting Round – Key Findings

Robin Wynde

RSPB

Lead Partners

- Trend*
- Progress on targets
- Monitoring adequacy*
- Threats
- Constraints
- Successes

LBAPs

- Constraints*
- Successes
- Plan/policy Integration

What was the response rate?

- 44 HAPs (98%)
- 364 SAPs (94%)
- 126 LBAPs (73%)

- BARS system worked well

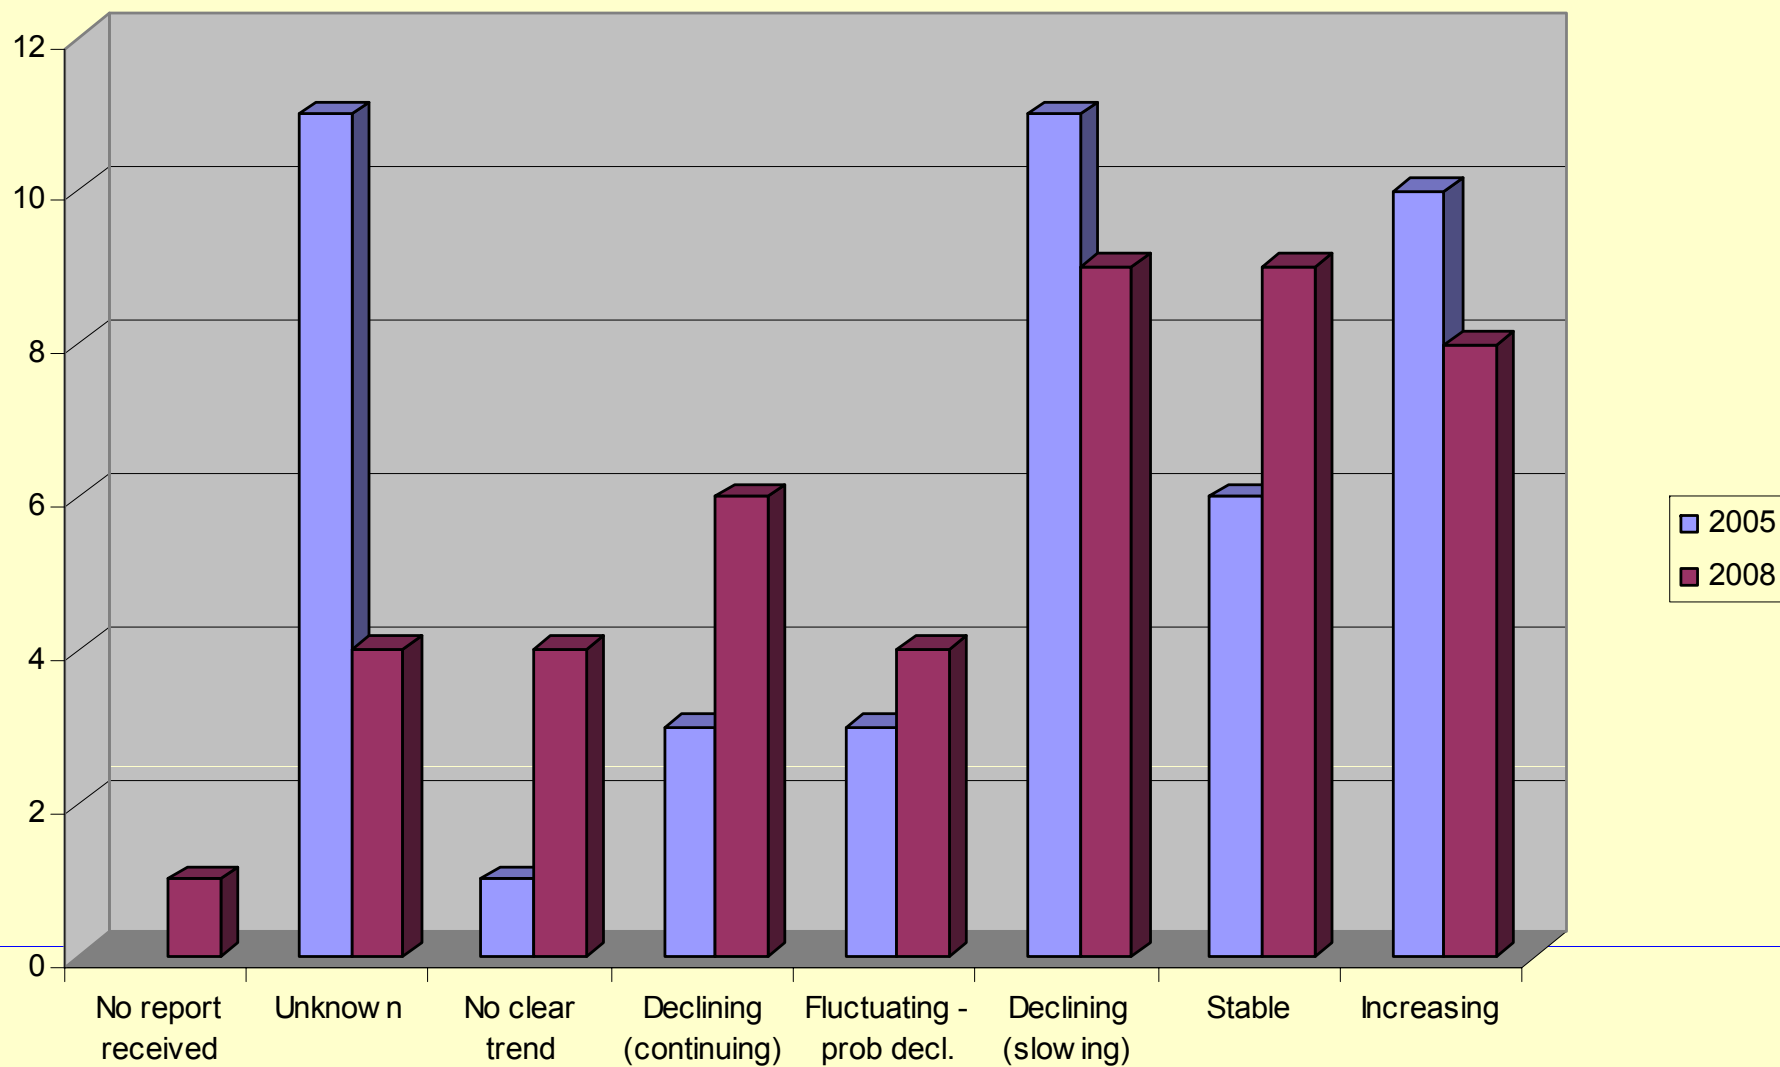

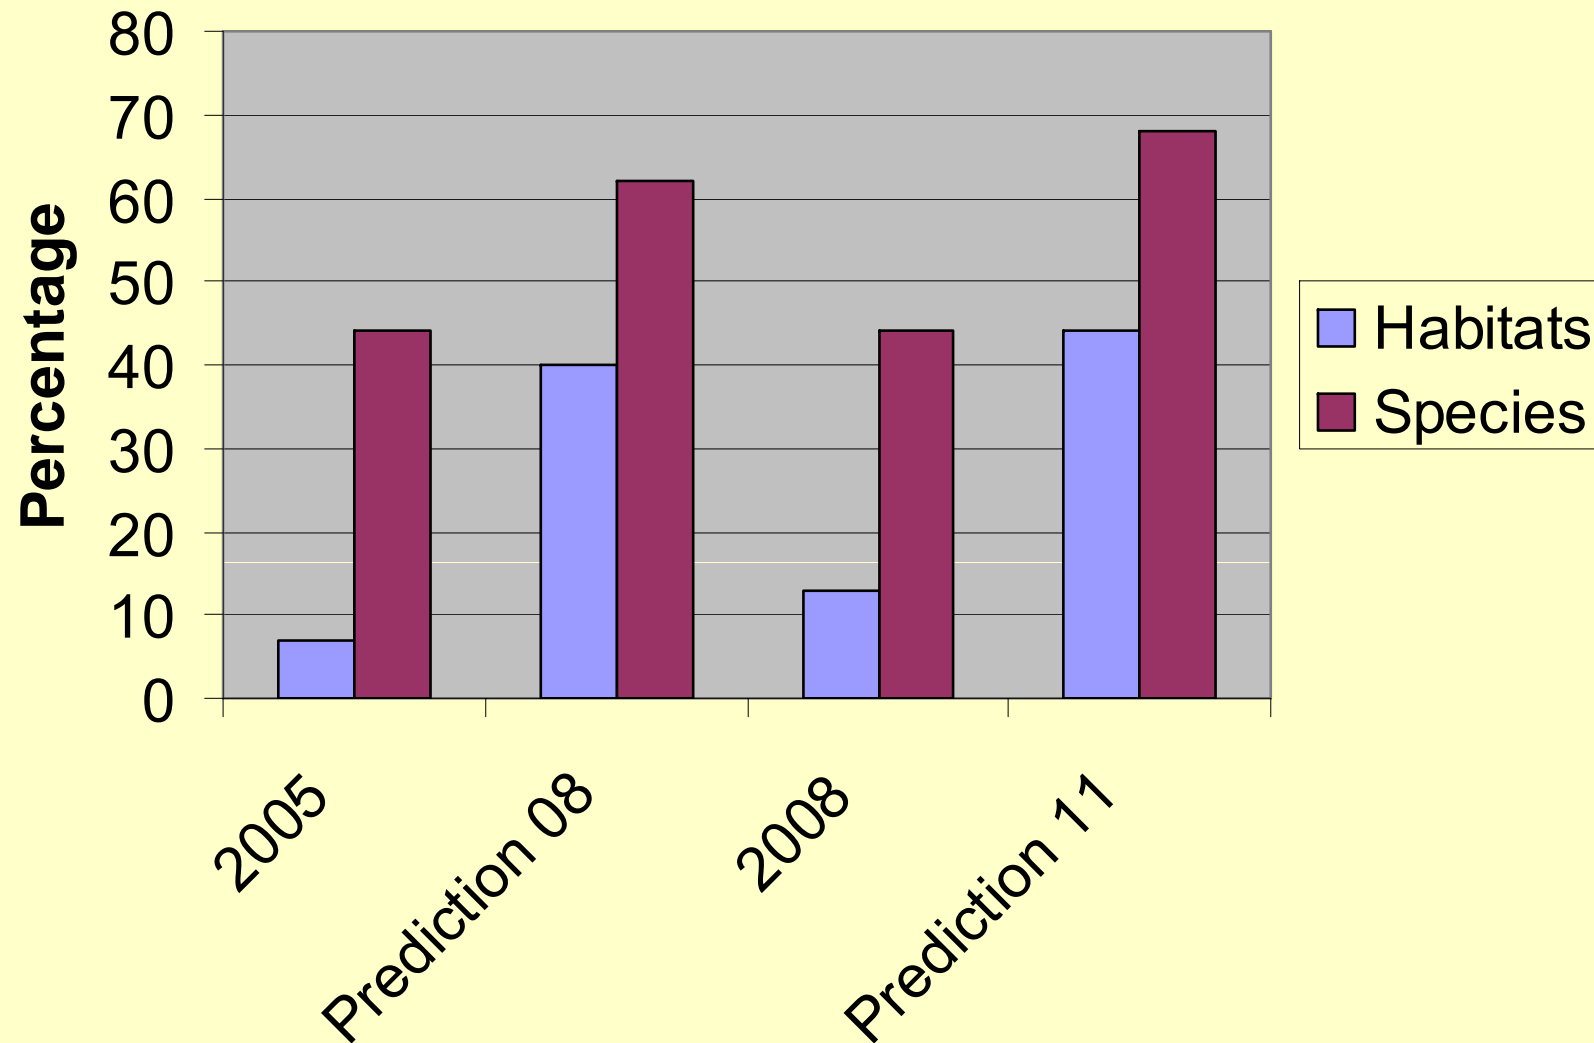

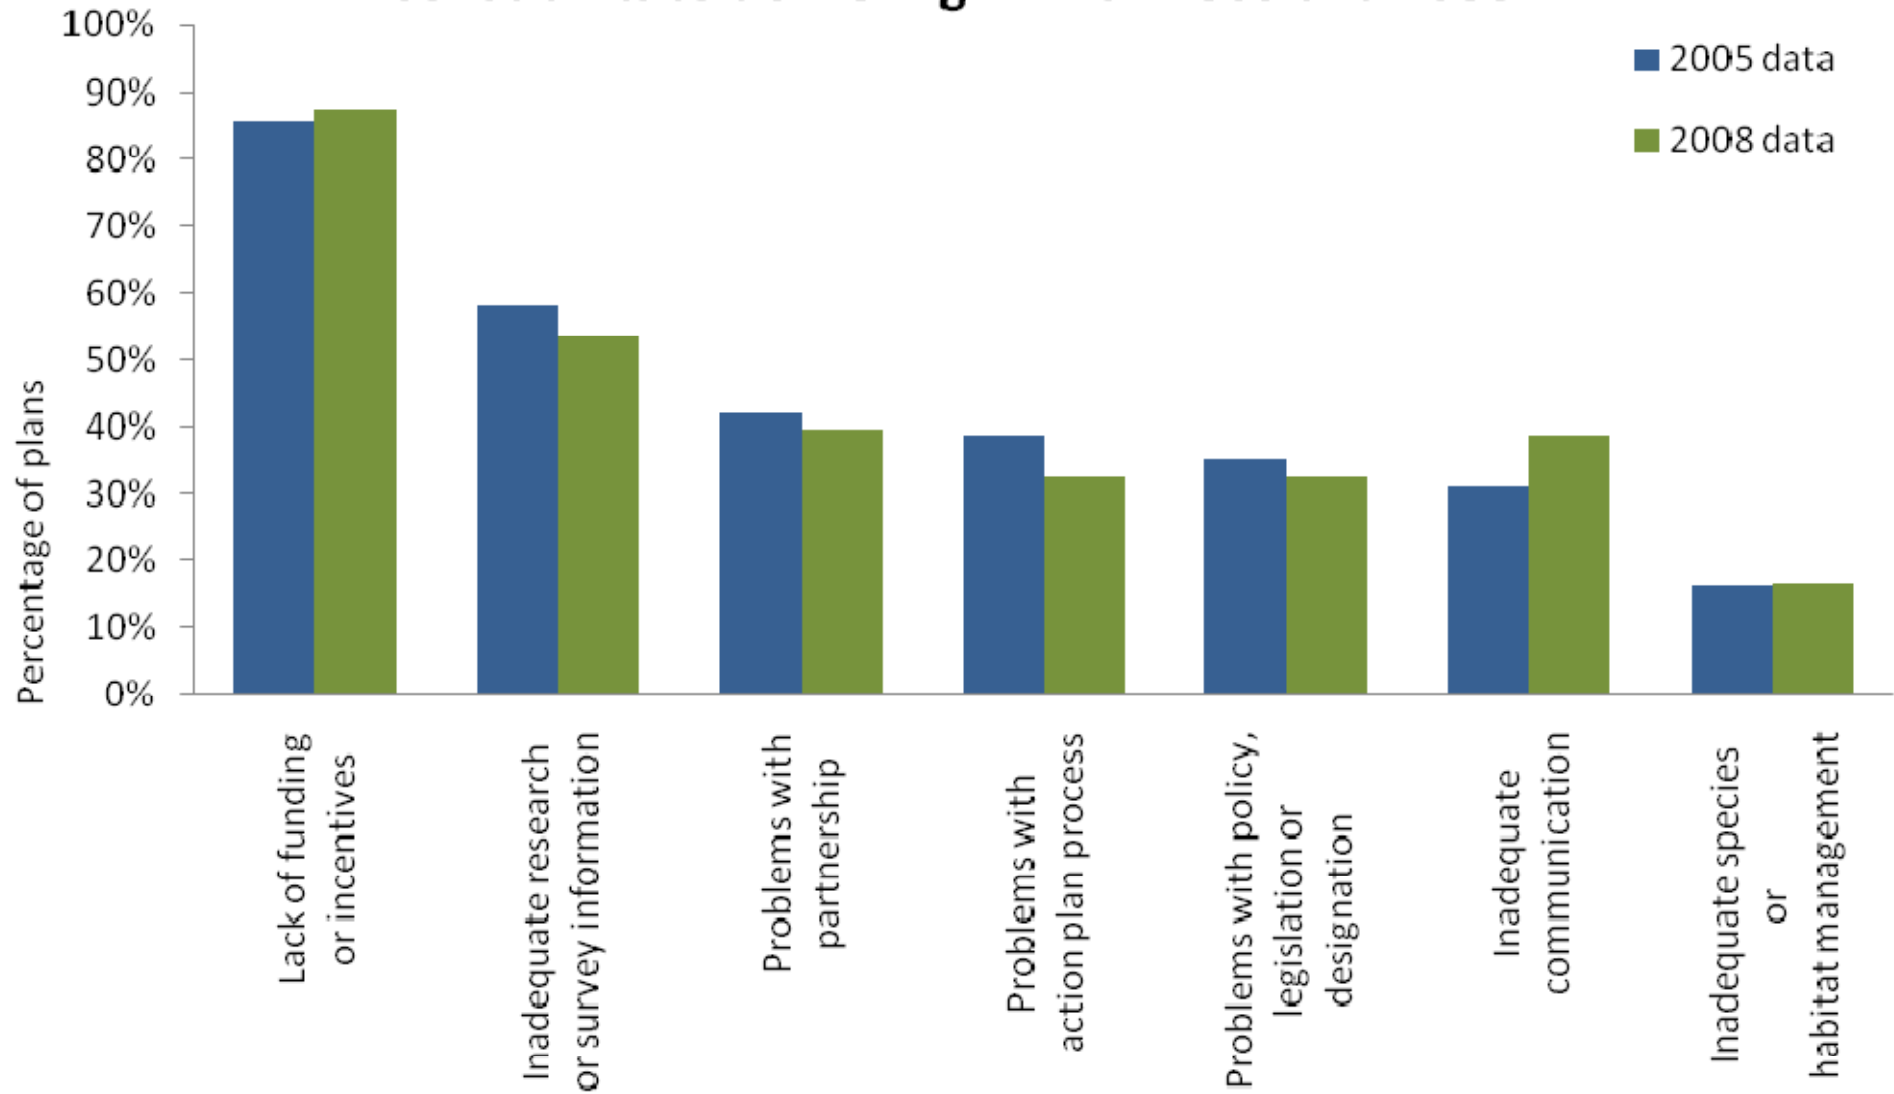

UK Habitat trends 2005 and 2008

Proportion of habitats and species with adequate monitoring

Constraints to delivering LBAPs - 2005 and 2008

How to access results?

- Summary report to be published soon?;
- Species and habitat reports and LBAP data are on BARS; <http://www.ukbap-reporting.org.uk/news/details.asp?X=55>

Key messages

- Since 1994, specific targets, plans and responsibility made a positive difference for some species and habitats;
- Overall, there has been limited progress since 2005;
- Lead Partners and LBAP co-ordinators have provided much valuable information;
- We need to use results at country level to guide improved delivery.
